INSTALLING AND SETTING UP METAMASK:

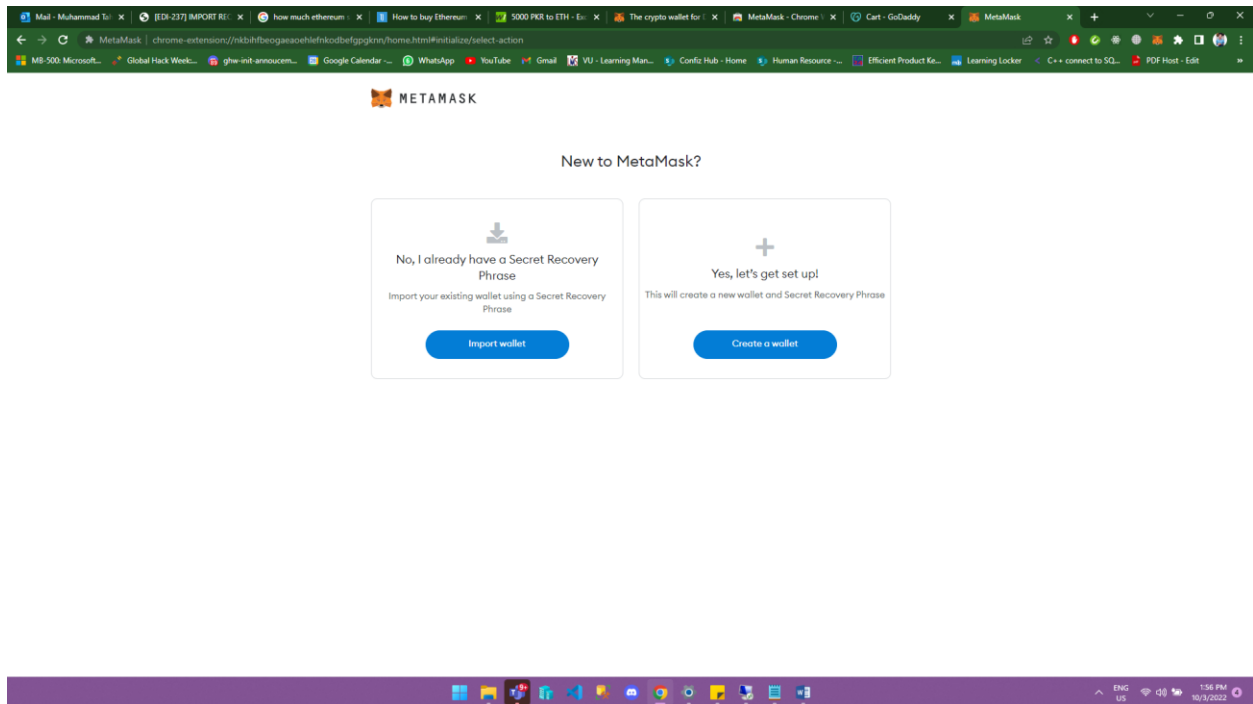

1. Welcome screen click Get Started to proceed

2. Click I agree

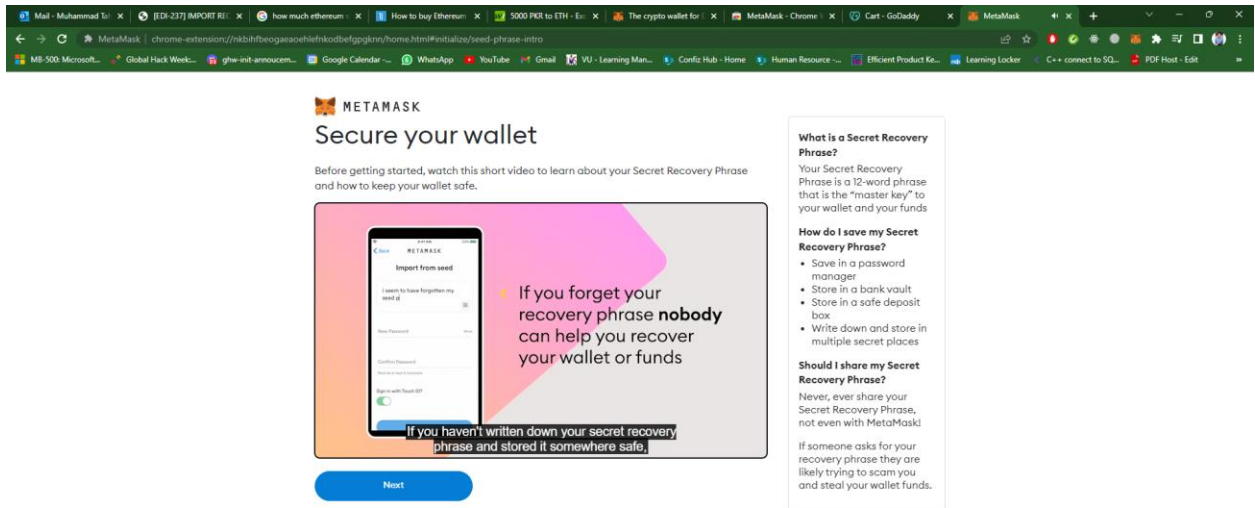

3. Click create wallet

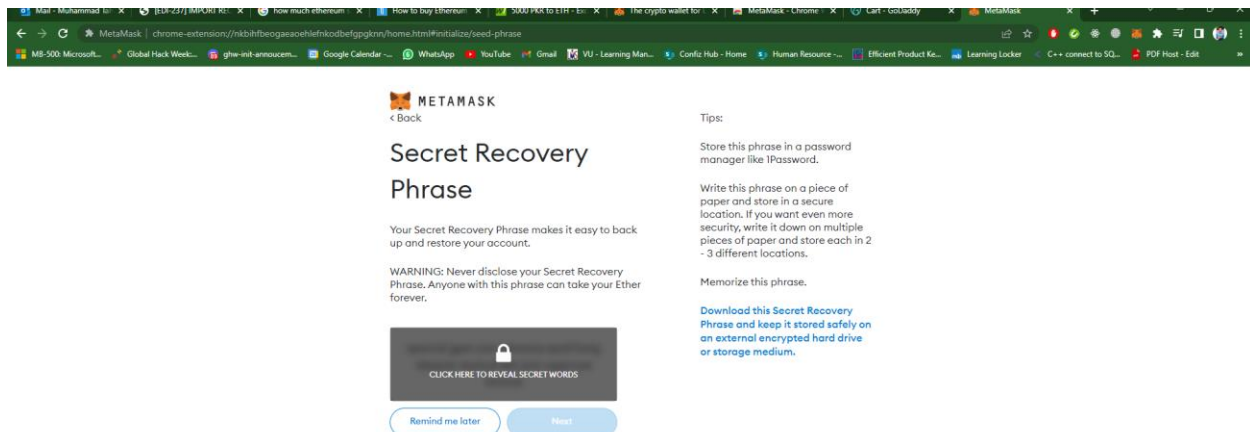

4. On the next screen create strong password and select I agree to the terms and conditions

A screenshot of the MetaMask 'Create password' screen. At the top is the MetaMask logo and a '< Back' link. The title 'Create password' is centered. Below it, there are two input fields: 'New password (8 characters min)' and 'Confirm password', both containing masked text (dots). Below the input fields is a checkbox that is checked, with the text 'I have read and agree to the Terms of use'. At the bottom is a blue 'Create' button.

5. Watch the video regarding securing your wallet, keeping your passphrase secure.

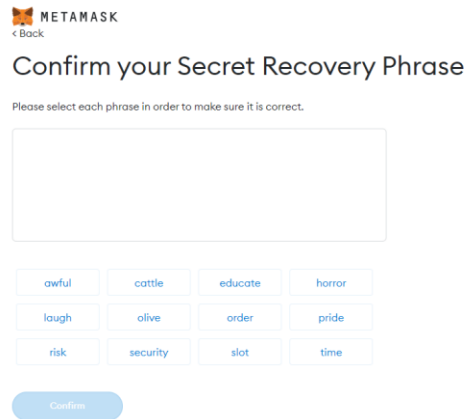

6. Click on reveal to see the secret recovery key, write it down on your phone or somewhere in your diary and keep it very safe.

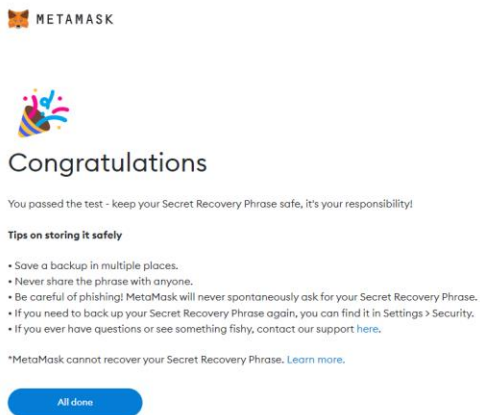

7. Save the recovery key somewhere safe.

8. On the next you have to confirm your recovery key once more by entering it again.

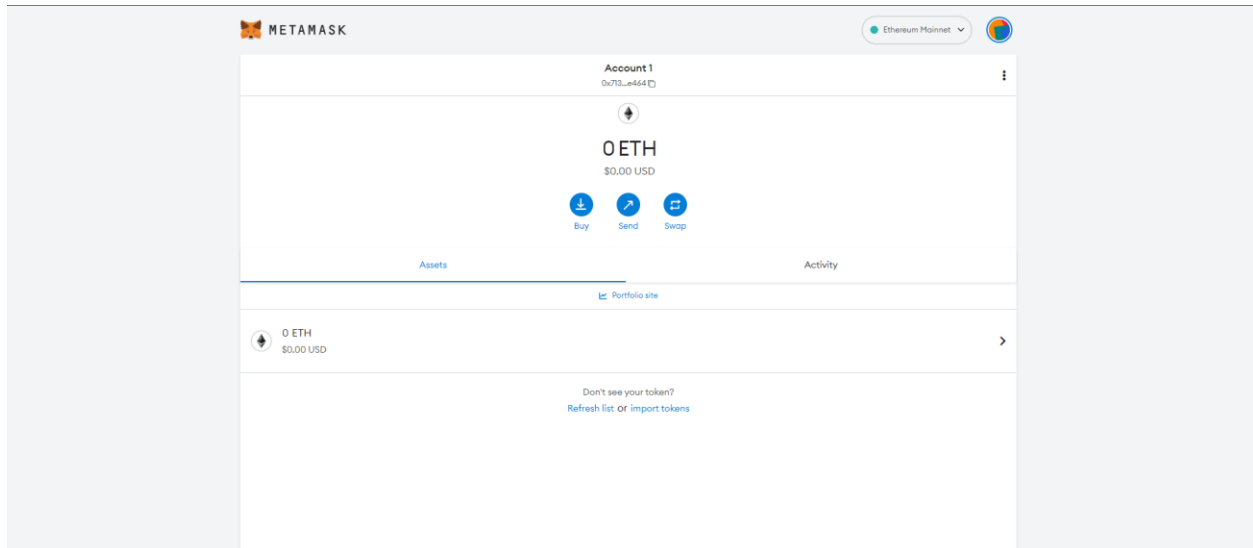

The screenshot shows the MetaMask interface for confirming a secret recovery phrase. At the top, the MetaMask logo and a 'Back' link are visible. The main heading is 'Confirm your Secret Recovery Phrase'. Below this, a instruction reads: 'Please select each phrase in order to make sure it is correct.' A large empty rectangular box is provided for the user to enter the phrase. Below the box is a grid of 12 words: awful, cattle, educate, horror, laugh, olive, order, pride, risk, security, slot, and time. At the bottom of the grid is a blue 'Confirm' button.

9. Click All done

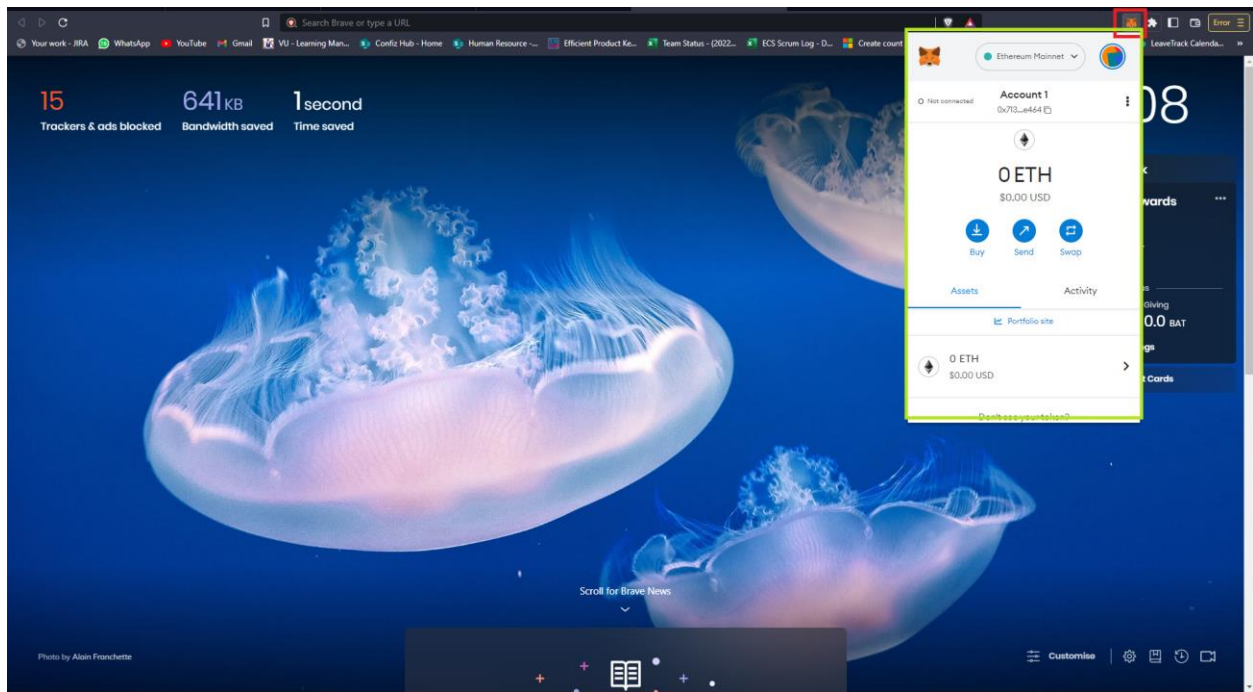

The screenshot shows the MetaMask 'Congratulations' screen. At the top, the MetaMask logo is visible. Below it is a colorful confetti icon. The main heading is 'Congratulations'. A message reads: 'You passed the test - keep your Secret Recovery Phrase safe, it's your responsibility!'. Below this is a section titled 'Tips on storing it safely' with four bullet points: 'Save a backup in multiple places.', 'Never share the phrase with anyone.', 'Be careful of phishing! MetaMask will never spontaneously ask for your Secret Recovery Phrase.', and 'If you need to back up your Secret Recovery Phrase again, you can find it in Settings > Security.' A footnote states: '*MetaMask cannot recover your Secret Recovery Phrase. [Learn more.](#)'. At the bottom is a blue 'All done' button.

10. Now you'll be taken to a screen showing all your accounts, current selected network and your available assets. You have the option to send, buy and swap tokens right from your Metamask wallet and this wallet can be accessed anytime by clicking on the Metamask extension.

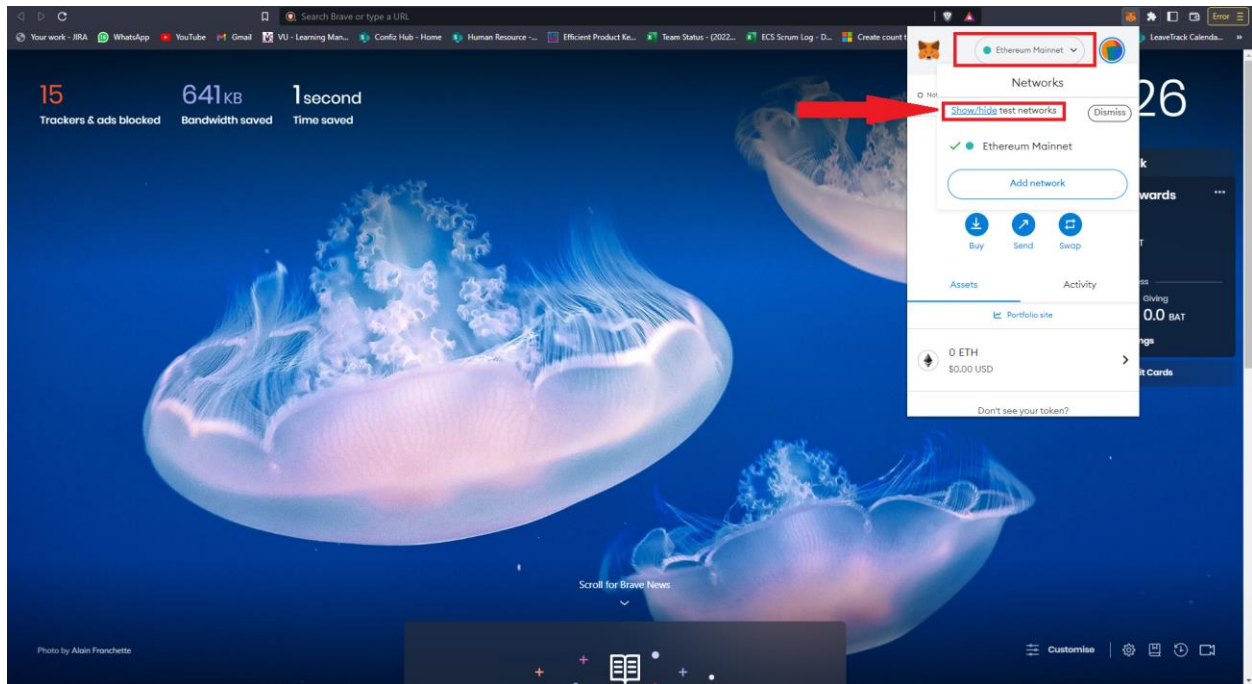

CONFIGURING METAMASK WALLET:

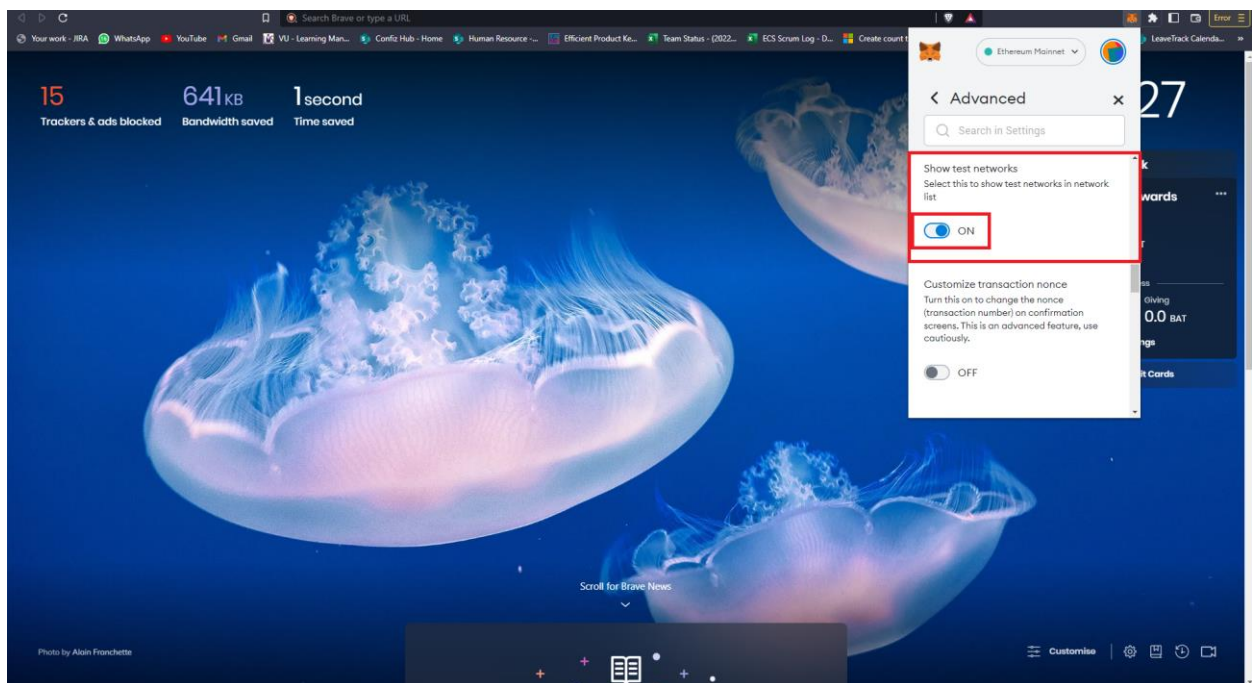

1. Click on the top to open the extension of Metamask wallet

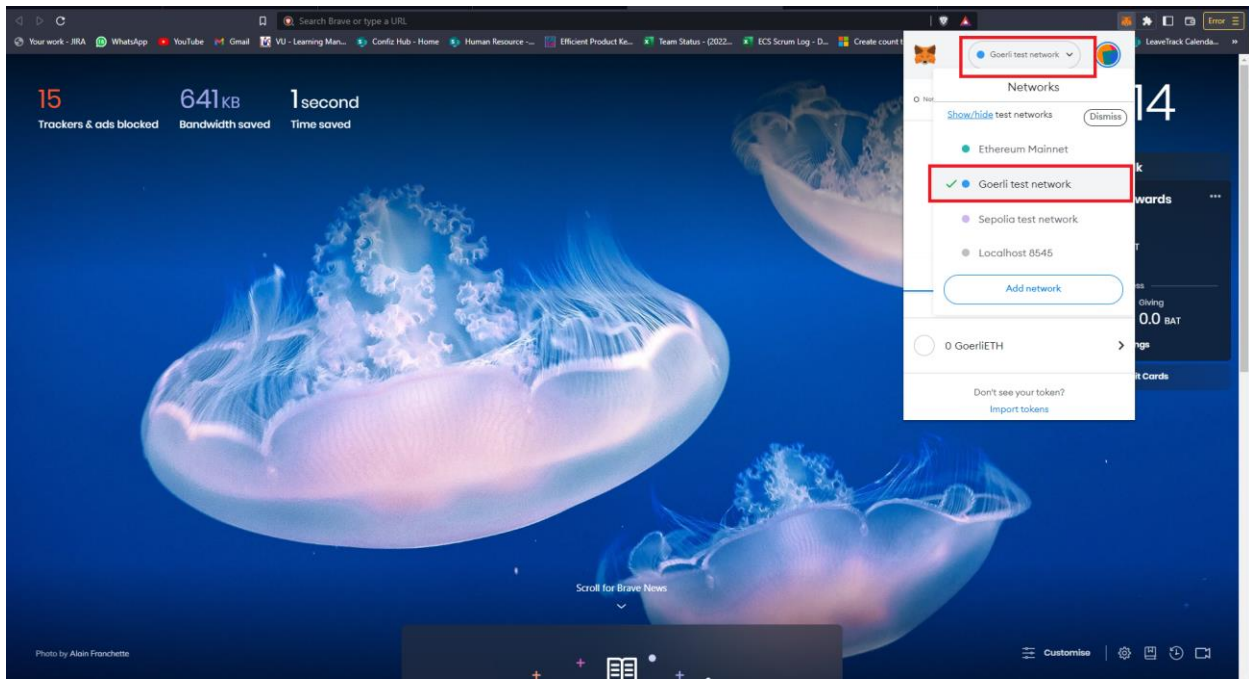

2. Click on Ethereum Network to expand all available networks and then click on Show/hide link to directly go to advanced wallet setting and enable the test networks.

3. Toggle button for Show Test networks

4. After closing the setting from the top above in the wallet extension click on Ethereum network again and select GoerliETH network from the drop down list.

5. Now you can see the GoerliETH network and tokens in your wallet and can go to any test net faucet and request for a 0.1 GoerliETH token to be transferred to your wallet.
